

THE NEST

This is our new sensory room at Lowerplace Primary School.

The NEST is a specially designed room, which combines a range of stimuli to help our students develop and engage their senses. This room is a safe environment for our pupils to explore and interact without risk.

Our Nest is a highly absorbing environment, where all students can find comfort and calm outside the classroom, this enables them to feel more engaged, resulting in our students feeling more focused, calm and ready to return to their classroom to fully engage with classroom activities.
